

We Are Vancrest Rehab.

Exceptional Physical Therapy, Occupational Therapy, and Speech-Language Pathology is found here. By trusting Vancrest's Team of professional clinicians, you will reach your rehabilitation goals in a setting that is optimal for you.

Physical Therapy will help you in building strength, improving joint mobility and restoring your balance and ambulation to get you back to doing the things that you love, safely. We will monitor your progress, challenge your ability, and provide education along the way to promote as much independence as possible.

Occupational Therapy will focus on those routine self-care tasks needed for you to go about your day by promoting strength, restoring joint mobility, and improving your endurance so you can be as self-sufficient as possible both within and outside of your home. Our therapists will introduce and explain adaptive equipment for optimal independence and complete a home assessment prior to you returning home to ensure your safety and success.

Speech Pathology works closely with dietary to ensure that you or your loved one has the safest diet consistency possible while they are experiencing an acute or chronic swallowing disorder. In addition, with the help of technology, they will customize a way to improve communication and/or comprehension skills for better self-expression of wants and needs with family and staff.

Therapy Solutions

We Deliver...Strength

The highest quality care & compassion starts with our therapists. We will assist you in building strength, regaining function, and enhancing your life in a setting that is comfortable for you. We provide both short-stay and long-term inpatient care, in-home care, and outpatient services.
